JOSIAS BROCH

DESCRIÇÃO

My name is Josias Broch, I'm Brazilian, a Front-end Developer and passionate about transforming ideas into interactive, intuitive and responsive solutions. My journey into programming began in 2021, when I wrote my first codes creating small websites in JavaScript, HTML and CSS for small businesses. This beginning was parallel to my degree in Systems Analysis and Development at the University of Passo Fundo, completed in 2023.

Throughout more than 4 years of experience in the technology area, I had the opportunity to work on several projects and collaborate with global teams. These experiences allowed me to work on projects using frameworks and languages such as React, Next, Vue, Nuxt, Angular, Svelte, JavaScript, TypeScript, Python, among others. I acquired several other skills such as learning different approaches to solving problems, developing efficient digital solutions and sharing knowledge.

Currently, my goal is to continually develop my concepts in software architecture, interface design, and user experience (UI/UX) to create modern, responsive, and functional interfaces, always seeking excellence and innovation.

Check out my GitHub: <https://github.com/brochjosias> to see some of my work in action.

Development:

- Frameworks = React.js, Next.js, Vue.js, Nuxt.js, Angular, Svelte, Node.js;
- Languages = JavaScript, TypeScript, HTML, CSS, Python, Java;
- Databases = PostgreSQL, MySQL, GraphQL, NoSQL, MongoDB, SQL, SQLServer, REST APIs, JSON...
- UI/UX Design = Tailwind, CSS, Scss, ChakraUI, Material...
- Other Technologies = Docker, Prisma, Sequelize...

FORMAÇÃO ACADÊMICA

01/2020 - 12/2023

Bachelor Degree : Analysis and Systems Development
University of Passo Fundo - PASSO FUNDO
Status - Concluído

HISTÓRICO PROFISSIONAL

02/2024 - 12/2024

Front-end Developer
Saicon Sistemas de Paisagem - Passo Fundo, RS

Tech Stacks: Next.js | TypeScript | Node.js | Python | Docker | PostgreSQL

Project: Development of a management system for beef and dairy cattle,

optimizing diet management and weight control.

Methods:

- Responsive and dynamic Front-End development;
- Implementation of design and prototypes aligned with the product;
- Integration between Front-End (Next.js) and Back-End (Python);
- Use of Docker for local environment and PostgreSQL as database;
- Use of version control tools (Git) and CI/CD for deployment automation and continuous integration;
- Testing and debugging, including unit and integration tests to ensure system quality and stability;
- Active collaboration with a multidisciplinary team.

01/2023 - 02/2024

Front-end Developer
Freelance - Passo Fundo, RS

Tech Stacks: React.js | Next.js | Vue.js | Nuxt.js | Angular | Svelte | JavaScript | TypeScript | Node.js | HTML | CSS | Tailwind | SCSS | Angular | PostgreSQL | MySQL | GraphQL | MongoDB | SQLServer | Docker | REST APIs

Some projects I've worked on:

- E-commerce specialized in fast-food delivery, with integration with the payment API for a fast and secure checkout experience;
- Inventory system, allowing precise control of products, automatic replenishment and demand analysis;
- Employee and customer management system, centralizing data, facilitating management and optimizing internal processes;
- Landing pages for marketing campaigns, focused on attractive design and high conversion rate.

Methods:

- Responsive and dynamic Front-End development, focused on performance and user experience;
- Implementation of design and prototypes aligned with the product, ensuring visual and functional consistency;
- Integration and Communication between Front-End and Back-End;
- Testing and Debugging, including unit and integration tests to ensure system quality and stability;
- Team Collaboration using agile methodologies such as Scrum and Kanban, promoting fast and efficient deliveries;
- Implementation of accessibility and SEO best practices to optimize user experience and improve search ranking;
- Use of version control tools (Git) and CI/CD to automate deployments and continuous integration.

01/2022 - 12/2022

Data Analyst
Automasul - Passo Fundo, RS

- BI and SQL Data Analysis;
- Development of Advanced SQL Queries;
- Development of Dashboards with Power BI;
- Development of ADVPL Protheus;
- User Support.

CERTIFICAÇÕES

Advanced JavaScript: Advanced JavaScript Certificate in the Mastering React course on the DevSamurai Platform with an estimated workload of 8 hours;

Fundamentals of React.js: Fundamentals of React.js certificate in the course Mastering React on the DevSamurai Platform with an estimated workload of 4 hours;

Basic TypeScript: Basic TypeScript Certificate in the Mastering React course on the DevSamurai Platform with an estimated workload of 1 hour;

Basic Node.js: Basic Node.js Certificate in the course Mastering React on the DevSamurai Platform with an estimated workload of 3 hours;

Advanced Node.js: Advanced Node.js Certificate in the Mastering React course on the DevSamurai Platform with an estimated workload of 16 hours.
