ABOUT ME

Front-end developer specializing in Next.js, React, and React Native for over four years. I have contributed to building platforms for major companies in the healthcare, agribusiness, and energy sectors, delivering results and boosting profits in the digital market.

I aim to develop solutions that go beyond mere interface implementation, taking into account architecture, scalability, security, maintainability, UX, and business impact.

EXPERIENCE

MAY/2025 | QBEM TECH | FRONT-END DEVELOPER

Technologies: React, TypeScript, Styled Components, Zustand, BFF, Micro Frontends, Jest, Cypress, Kubernetes, Figma, LLMs, n8n

Development of QHealth, a health intelligence platform for population health management and decision support for health plan providers.

Activities:

- Developing scalable, responsive interfaces using React, TypeScript, and Styled Components (mobile-first approach), creating reusable components.
- Building analytical dashboards and interactive visualizations with ECharts; managing state using Zustand and Context API.
- Working with Micro Frontends architecture, Design Systems, and integration via BFF, microservices, and REST APIs.
- Implementing automated tests (Jest, Cypress) and conducting code reviews to ensure code quality.
- Handling deployment and containerization with Kubernetes, CI/CD pipelines, and version control using Git/Gitflow.
- Creating automations (n8n) and agents powered by LLMs.
- Working within agile squads, collaborating closely with the design team via Figma.

FEB/2024 - DEC/2024 | SAICON | FRONT-END DEVELOPER

Technologies: Next.js, TypeScript, Tailwind CSS, Material UI, Redux, NestJS, BFF, Microservices, Vitest, Playwright, Docker, PostgreSQL

Development of a feed management system for beef and dairy cattle, focused on diet management, weight monitoring, and herd administration.

Activities:

- Development of scalable, responsive interfaces using Next.js, TypeScript, and Tailwind CSS (mobile-first); creation of analytical dashboards with Material UI and work on design systems.
- State management with Redux and REST API integration, focusing on security and decoupling.
- Creation of server-side routes using NestJS (layered architecture); integration with BFF and microservices, ensuring scalability and efficient communication.

- Automated testing with Vitest and Playwright, enhancing reliability and reducing regressions; participation in code reviews.
- Docker, CI/CD pipelines, and version control using Git/Gitflow within multidisciplinary agile squads.

JAN/2023 – FEB/2024 | FRONT-END DEVELOPER FREELANCER

Technologies: React, React Native, Next.js, Vue.js, Nuxt.js, Angular, Docker, Jest, Design Systems, APIs REST

Development of digital products for various sectors including management systems, e-commerce sites, and landing pages using diverse technology stacks and involving direct client contact.

Activities:

- Built and optimized interfaces using React, Next.js, Vue.js, Nuxt.js, and Angular, creating reusable and scalable components.
- Developed a mobile application using React Native and TypeScript for delivery tracking and field livestock management, featuring an "Offline-First" architecture (AsyncStorage + background syncing), Zustand, GPS, QR Code integration, and Firebase.
- Developed management systems for inventory, customer, employee, and operational process control, applying mobile-first and responsive design principles.
- Built e-commerce platforms featuring product and order management and integration with payment APIs.
- Created landing pages focused on performance, SEO, usability, and UX, while prioritizing Core Web Vitals.
- Worked on front-end architecture, Design Systems, and REST API integration.
- Implemented automated tests using Jest, enhancing reliability and reducing regressions.

ACADEMIC BACKGROUND

2020 - 2023 | UNIVERSITY OF PASSO FUNDO

Technologist in Systems Analysis and Development

TECHNOLOGIES

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Python

Frameworks: React, React Native, Next.js, Vue.js, Nuxt.js, Angular

Styling & UI: Tailwind CSS, Styled Components, Material UI, Mobile First, UX, Figma

Architecture and Patterns: Micro Frontends, Design Systems, Clean Code, SOLID, SPAs, SSR, BFF, Microserviços

State Management: Redux, Redux Saga, Context API, Zustand, Custom Hooks

APIs and Integrations: REST, GraphQL, NestJS, Express, JWT, OAuth, CMS Headless

Tests: Jest, Vitest, React Testing Library, Cypress, Playwright

Database and ORM: PostgreSQL, MySQL, MongoDB, Prisma, Sequelize

Cloud & DevOps: AWS, Firebase, Docker, Kubernetes, CI/CD, Git, Gitflow

Performance: Core Web Vitals, Otimização de Performance

AI and Automation: LLMs, Agentes de IA, Prompt Engineering (Codex/Claude), n8n

Methodologies: Agile, Scrum, Kanban, Code Review

LANGUAGES

Portuguese – Native

English – Advanced (C1)
